

CENSUS OF MISSOURI PUBLIC WATER SYSTEMS 2020

Missouri Department of Natural Resources
Division of Environmental Quality
Water Protection Program
Public Drinking Water Branch

PREFACE

The Missouri Department of Natural Resources is pleased to publish the 2020 edition of the annual Census of Missouri Public Water Systems. This publication provides detailed information for Missouri public water systems including information regarding supply capacity, source water type, population served, select monitoring results, and types of treatment being used. The department hopes this publication will serve as a useful reference for anyone needing information about a Missouri public water system.

In addition to the Census, additional resources are available:

The Annual Compliance Report of Missouri Public Drinking Water Systems lists violations by individual water systems as well as statewide data for the calendar year and is available at: <https://dnr.mo.gov/env/wpp/fyreports/index.html>

Complete results of all the chemical analyses taken at public water systems are on file at the office of the Missouri Department of Natural Resources' Public Drinking Water Branch and online on our Drinking Water Watch webpage at: <https://dnr.mo.gov/DWW/>.

You can view your water system's Consumer Confidence Report at: <https://dnr.mo.gov/ccr/index.html>.

For questions about this document you may call the Department's Public Drinking Water Branch at 800-361-4827 or 573-751-8526.

I. GENERAL INFORMATION

GENERAL INFORMATION INTRODUCTION

The general information section contains Missouri counties listed by the Department of Natural Resources' regions. Also contained in this section is a map of the Department's regional and satellite office locations.

Counties By Region

Kansas City Regional Office

II. STATISTICAL INVENTORY INFORMATION

STATISTICAL INVENTORY INFORMATION INTRODUCTION

The statistical inventory information section contains two tables. The first table gives the number of regulated systems by region and system type. The second table contains system totals and population totals by source type.

Number of Regulated Systems By Region and System Type

Region	Number of Community Systems	Number of Nontransient, Noncommunity Systems	Number of Transient, Noncommunity Systems	Total Number of Systems
CENTRAL FIELD OPERATIONS CFO	158	24	285	467
KANSAS CITY REG OFFICE KCRO	240	8	59	307
NORTHEAST REG OFFICE NERO	204	8	10	222
SOUTHEAST REG OFFICE SERO	239	53	159	451
SOUTHWEST REG OFFICE SWRO	385	88	456	929
ST. LOUIS REG OFFICE SLRO	202	39	123	364
Total Systems	1,428	220	1,092	2,740

Community Water System Populations

Source Type		Total Number of Systems	Total Population Served
Primary Groundwater			
	Systems using Groundwater	1,050	1,872,540
	Systems using Groundwater Under Direct Influence	3	12,673
	Total for Primary Groundwater Systems	1,053	1,885,213
Primary Surface Water			
	Systems using Surface Water - Streams	59	2,444,282
	Total for Primary Surface Water Systems	59	2,444,282
Secondary			
	Secondary System using Groundwater	156	210,202
	Secondary System using Groundwater Under Direct Influence	3	15,231
	Secondary System using Surface Water	157	870,779
	Total for Secondary Systems	316	1,096,212
	Grand Total	1,428	5,425,707

III. COMMUNITY WATER SYSTEM INVENTORY INFORMATION

COMMUNITY WATER SYSTEM INVENTORY INFORMATION

INTRODUCTION

KEY TO CODES AND ABBREVIATIONS

The community water system inventory information section contains data on community public water systems regulated by the Missouri Department of Natural Resources' Public Drinking Water Branch. A community public water system serves at least 15 service connections and is operated on a year-round basis or regularly serves at least 25 residents on a year-round basis (Missouri Safe Drinking Water Regulations 10 CSR 60-2.015). These systems include, but are not limited to, cities, water districts, subdivisions, mobile home parks and institutions.

Community water system inventory information provides basic information such as the required water system operator level and the required distribution system operator level, the year the system began providing water, the ownership type, the number of people served and the number of service connections. These systems are divided by type of community into three alphabetical lists. The first list contains city systems, the second list contains water district systems and the third list contains subdivision, mobile home park, institution and miscellaneous systems. This section also provides a list of systems that sell water and whom they sell to, as well as a list of systems that buy water and whom they buy from.

AVG = Average
MGD = Million Gallons per Day

DISTRIBUTION SYSTEM OPERATOR LEVEL (Listed second, if available under Operator Level, Example: "A1" or "1"):

- 1 – Requires a minimum of one-half year of distribution operations experience. 2 – Requires a minimum of 1 year of distribution operations experience.
- 3 – Requires a minimum of 3 years of distribution operations experience.

Both the water system operator level and the distribution systems operator level for community public water systems are classified according to system capacity, source of water, character of water, character of water being produced, complexity of treatment and other physical conditions that may affect a system. The department uses this classification system to determine the certification level necessary for the chief operator to supervise the operation of a facility (Missouri Safe Drinking Water Regulations 10 CSR 60-14.010).

OWNER TYPE: F – Federal Government P – Private
 S – State Government L – Local Government

SOURCE WATER PERCENTAGES:

PCT GRD = Percent of Source that is Groundwater
PCT PUR GRD = Percent of Source that is Purchased Groundwater
PCT PUR SUR = Percent of Source that is Purchased Surface Water
PCT SUR = Percent of Source that is Surface Water
PCT GW UNDER INFL = Percent of Source that is Groundwater under influence of Surface Water
PCT PUR GW UND INFL = Percent of Source that is Purchased Groundwater under influence of Surface Water

IV. NONCOMMUNITY WATER SYSTEM INVENTORY INFORMATION

NONCOMMUNITY WATER SYSTEM INVENTORY INFORMATION

INTRODUCTION

The noncommunity water system inventory information section contains data on noncommunity public water systems regulated by the Missouri Department of Natural Resources' Water Protection Program, Public Drinking Water Branch. There are two types of noncommunity public water systems. One type of noncommunity public water system is a transient noncommunity public water system. This is a public water system that is not a community water system, which has at least 15 service connections or regularly serves an average of at least 25 individuals daily at least sixty days out of the year (Missouri Safe Drinking Water Regulations 10 CSR 60-2.015). This means that for the most part, the population changes daily. These systems include, but are not limited to, recreational areas, restaurants, highway rest areas, hotel/motels, campgrounds, etc. The second type of noncommunity public water system is a nontransient noncommunity public water system. This is a public water system that is not a community water system and that regularly serves at least 25 of the same persons over six months per year (Missouri Safe Drinking Water Regulations 10 CSR 60-2.015). This means that for the most part, the same population returns daily to the facility. These systems include, but are not limited to, factories, large businesses and industries, schools, etc.

Noncommunity water system inventory information contains a complete listing of active noncommunity water systems. This list contains the system name, county of location, system identification number, system type and season begin and end dates. The noncommunity listing is first by county and then alphabetical within the county.

Noncommunity Water Systems

VII. CHEMICAL ANALYSES OF COMMUNITY WATER SYSTEMS

CHEMICAL ANALYSES OF COMMUNITY WATER SYSTEMS

INTRODUCTION

KEY TO CODES

The chemical analyses of community water systems section contains data on inorganic chemical (IOC) test results. Under Missouri's Public Drinking Water Regulations (10 CSR 60-4), systems utilizing surface water sources in whole or in any part are required to submit water samples every year for IOC analyses while those systems utilizing only groundwater sources are required to submit samples once every three years. All systems are required to sample annually for nitrates. These analyses are performed by the Missouri Department of Natural Resources' laboratory. Results are given in this section for a group of common IOCs that each community system tests for, and the value provided represents the most recent sample for the chemical. If no result is listed, the water system has never been sampled for the specified chemical. This may be because the water system is newly activated, or the water system has recently been reclassified as a community water system.

Below is a list of chemicals included in this section. In parentheses behind some of the chemicals are suggested upper limits or regulatory maximums given in Milligrams Per Liter. In addition to the below named chemicals, analyses was also completed for the following inorganic chemicals: Arsenic, Barium, Cadmium, Chromium, Lead, Mercury, Selenium, and Thallium. The complete results of all of the chemical analyses are on file in the office of the Missouri Department of Natural Resources' Public Drinking Water Branch, and can be viewed at dnr.mo.gov/DWW/. Results that are below the detection limit are marked as "ND".

AL – Aluminum (200.0–500.0)	ALK – Alkalinity, Total as CaCO ₃
CA – Calcium	CL – Chloride (250.0)
CU – Copper (1000.0)	F – Fluoride (2.0)
FE – Iron (300.0)	K – Potassium
MG – Magnesium	MN – Manganese (50.0)
NA – Sodium	NO ₃ – Nitrate (10.0)
PH – pH	SO ₄ - Sulfate (250.0)
TDS – Total Dissolved Solids (Total Filterable Residue) (500.0)	TH – Total Hardness

In the following results, chemicals are listed in terms of either Milligrams per Liter (parts per million), Micrograms per Liter (parts per billion), or, in the case of PH, pH units. The chemicals are measured as follows:

Milligrams per Liter (mg/L)		Micrograms per Liter (ug/L)
ALK – Alkalinity, Total	NA - Sodium	AL - Aluminum
CA – Calcium	NO ₃ - Nitrate	CU - Copper
CL - Chloride	SO ₄ - Sulfate	FE - Iron
F - Fluoride	TDS – Total Dissolved Solids	MN - Manganese
K - Potassium	TH – Total Hardness
